Upcoming Projects in the Tapmoon Ecosystem

CRYPTO 👀 DAILY HUNT

www.cryptodailyhunt.com   www.tapmoon.io

We are now going to talk about the upcoming projects of the Tapmoon ecosystem.

First of all, I want to make it clear that for any token to succeed in the market and for its price to continuously increase, it's not enough to have just liquidity—we also need diverse types of communities.

And these different communities can only be built when we develop multiple types of projects that increase the use case of our **TAPS token**. To expand the TAPS token,s utility, we are going to launch **4 new projects in 2025, i**n addition to the **Tapmoon Liquidity Program.**

Project 1: CryptoDailyHunt.com

This is a visionary project, ahead of its time. It is designed to provide all the essential tools a crypto trader would need. If a trader uses the tools provided by this platform, they will never incur losses in crypto trading.

Key Features:

You will find articles from all global crypto news portals in one place, within this project.

- 🔭 You can connect your Metamask or any other wallet to view your portfolio directly from the platform.
- 🔭 With AI support, a specialized tool is provided:
  You can search for any token, and the platform will show you complete token data.
- 🔭 It will also display social media trends and market sentiments related to that token.

- 👓 This will allow traders to make decisions easily and intelligently. Additionally, you can promote your own crypto project to the community using this platform.
- 👓 All these services will require the use of TAPS tokens
- 👓 Additionally, you can promote your own crypto project to the community using this platform.
- 👓 All these services will require the use of TAPS tokens

Project 2: Toncoin APY Program (Unofficial Collaboration)

A while ago, I spoke to you all about ETFs (Exchange-Traded Funds). As of now, only two coins are listed with the U.S. SEC:

- 👓 Bitcoin (BTC) is being traded via both Spot and Futures ETFs
- 👓 Ethereum (ETH) is currently being traded only via Futures ETFs

I also explained which other coins are likely to get listed as ETFs in the future. One of those coins is Toncoin. It gives me great pleasure to announce that Toncoin (the native coin of Telegram) is entering into a collaboration with the Tapmoon ecosystem.

To grow its community, Toncoin is unofficially launching its own APY (Annual Percentage Yield) program. The Tapmoon ecosystem will serve purely as a mediator in this program.

Program Details:

- Users will invest in Toncoin and stake it.
- In return, Toncoin will offer some profit.
- Officially, Toncoin offers a 4%-20% APY annually.
- The unofficial percentage will be discussed at a later stage.
- Tapmoon will be just a technology mediator—participation in this APY program will becompletely at your own risk.
- There will be no guarantee or liability from our side.

Requirement for Tapmoon Users:

Users who join the Toncoin APY program through the Tapmoon ecosystem will be required to:
Pay 25% of their APY package value in TAPS tokens

Risk Protection Clause:

If Toncoin fails to deliver returns, Tapmoon will try to encash the 25% TAPS token amount torepay the users principal.

Toncoins Technical Support to Tapmoon:

In return for this collaboration, Toncoin will support Tapmoon in developing the following:

Tapmoon Blockchain

Tapmoon Wallet

NFT Platform

Node Infrastructure

Marketplace

DeFi Ecosystem

Explorer Tools

And many more upcoming products

Additionally, Toncoin will support Tapmoon in getting its native blockchain coin listed as a future ETF.

I want to repeat once again:
There is no pressure on anyone to participate in this program.
It is completely optional.

Project 3:
Blockchain Name Service (BNS)
Own & Trade NFT Domains

Buy & sell NFT domains on top 10 blockchain networks.
Secure premium blockchain domains and trade them for profits.
Turn NFT domains into a valuable investment and grow your portfolio.

Why Choose Our Dapp?

☑ 100% AI-powered trading – No manual effort required!
☑ Multiple income streams – Trade, earn, and grow effortlessly.
☑ Full transparency & decentralization – Your funds, your control!
☑ Community-driven rewards – Earn more with our unique referral structure.
☑ Revolutionary ecosystem – A single app for trading, news, NFTs, and more!

Get ready to experience the future of crypto trading & earning like never before! Stay tuned – Something BIG is coming soon!

Project 4: AI-Driven Trading with API Integration

Connect your exchange account seamlessly with our app using API keys.

Our AI trading bot will execute smart trades on your behalf, ensuring maximum profitability.

All profits go directly to your exchange account, making trading effortless for you!

Profit-sharing model: A small fee on your trading profits will be paid in TAPS tokens & USDT.

The TAPS tokens paid as fees will be distributed among your uplines, unlocking a powerful passive earning system!
